PROFESSIONAL SUMMARY

Assistant System Engineer at TCS with hands-on experience in Network Operations Center engineering. Skilled in system monitoring, alert management, incident investigation, and operational support using SolarWinds and ManageEngine OpManager. Electrical and Electronics Engineering graduate interested in cloud, networking, automation, and Generative AI.

TECHNICAL SKILLS

Monitoring and Operations: NOC Operations, SolarWinds, ManageEngine OpManager, Monitoring and Alerts, Incident Investigation

Technical: Python, SQL Server, Networking, Cloud Fundamentals, Gen AI

Professional: Troubleshooting, Operational Reliability, Adaptability, Continuous Learning

PROFESSIONAL EXPERIENCE

Assistant System Engineer | Tata Consultancy Services (TCS)

Network Operations Center (NOC) Engineering

- Monitor systems and infrastructure using SolarWinds and ManageEngine OpManager.
- Manage alerts, investigate incidents, and support reliable daily IT operations.

Implant Trainee | Bharat Electronics Limited

Gained exposure to engineering development, quality management, product assurance, and quality testing for defense equipment.

Intern | Jai Balaji Control Gears Pvt. Ltd.

Learned about electromechanical limit switches and wave-soldering processes.

PROJECTS

AI-Powered Traffic Management

Developed a real-time traffic classification and signal optimization system designed to identify vehicles, ambulances, and people with disabilities.

Monitoring Tools

Used SolarWinds and ManageEngine OpManager to track performance, investigate incidents, and support operations.

EDUCATION AND CERTIFICATIONS

B.E. Electrical and Electronics Engineering

Sri Sairam Institute of Technology | 2021 - 2025 | CGPA: 7.46

Microsoft Azure Fundamentals (AZ-900) | Microsoft 365 Fundamentals (MS-900)

NPTEL Elite: Computer Networks and Internet Protocol | Introduction to Internet of Things | Digital Circuits

Achievement: Finalist, Smart India Hackathon 2024
